Paul, I'm sure that would be fine. CC

Re: Fw: Seed Mix

Thanks, Chris.

There are two species I would be interested in seeing added to this list, one native and one not. They are Castle Valley clover (*Atriplex gardneri* var. *cuneata*) and Russian wild rye (*Elymus junceus* or some other name). I wouldn't think the BLM would object to Castle Valley clover.

Seed Mix

Hi Chris

here is a seed mix

Jessie's Twist Seed Mixe

Existing Vegetation

Dominant shrubs

- Shadscale
- Gardner Saltbush
- Mat Saltbush

Sparse Shrubs

- Winterfat
- Ephedra (torreyana)
- Four wing Saltbush

Grasses

- Galletta
- Sand dropseed
- Indian ricegrass

Forbs

- Scarlet globemallow

Seed Mix – This seed mix recommendation is assuming proper seedbed preparation, dormant fall planting, and broadcast seeding methods. A good seedbed needs to be prepared, contour furrows to help trap any available moisture may be required. Currently invasive weeds including cheatgrass and halogeton are not present; if invasive species become present, the seed mix may need to be revised to better compete with the invasive species. This seed mix should be used as a guide; if changes are needed due to availability of seed or other factors work with an authorized BLM specialist.

	Species	Code	Seeding Rate (PLS/ac)
1	Shadscale	ATCO	1
2	Winterfat	KRLA2	1
3	Galletta	PLJA	1
4	Dropseed, Sand	SPCR	1
5	Ricegrass, Indian	ACHY	4
6	Globemallow	SPCO	1
	Total		9
